Projects

Give Me My Money
July 2018 – August 2018

GiveMeMyMoney **is a subscription based application that allows "Admins" to upload invoices, and set automatic email/sms messages to be sent to their "Client". The client can click the link in the email/sms and be directed to a page where they can easily and without barriers make the required payment to the admin.** Working with a team of 3 developers and a Project Manager. I was responsible for the email functionality between the "Admin" and the "Client", making sure the admin would be able to send a reminder to the client from the invoice reminder page. As well as setting up the deployment systems and database(Heroku, mLab) and adding certain aspects of backend functionality(Reminders page, sidebar). Tech: React, Redux, React-Native, Node, Express, MongoDB, Heroku, mLab.

Check it out!

Experience

Freelancer at Devinci Tech Solutions
April 2017 – Present

I freelance under Devinci Tech Solutions, I provide Web and Social Media services to clients, as well as music production.

Front End Developer Intern at TheLatest.com Inc, Santa Monica, CA
September 2015 – February 2016

As a intern I worked on some of the front-end development of the mobile application and was a video podcast host.

Education

Certificate In Software Engineering, Lambda School, San Francisco
January 2018 – August 2018

The Lambda Academy of Computer Science covers computing from its fundamentals to fully-deployed, applications. Lambda School is an extensive full-time 7 month Computer Science Academy focused on Full-Stack Web Development. Technologies covered at Lambda:

- **-Responsive UI/UX Development with use of media queries**
- **-Web Tools, UI Frameworks, Preprocessors: CSS, LESS, SASS, SCSS**
- **-Advanced Javascript ES6 & JQuery -Intermediate ReactJS -Redux**
- **-Node JS/Express -RESTful APIs for CRUD -HTTP -MongoDB (NoSQL)**
- **-Authentication -Testing (Mocha, Chai) -Data Structures/ Algorithms**
- **-Computer Architecture -C/ Operating Systems -Python**

Skills

HTML
